

IMPACT OF ACCELERATING TECHNOLOGY

A Selected Bibliography

U.S. ARMY WAR COLLEGE LIBRARY

September 2013

PREFACE

This bibliography highlights the impact of the rapidly increasing role of technology in our Armed Forces. Topics covered include adaptation, artificial intelligence, budgetary issues, command and control, ethics, intelligence, and strategy.

With certain exceptions, the materials in this bibliography are dated from 2010 to the present. All items are available through the USAWC Library. For your convenience, we have added U.S. Army War College Library call numbers, Internet addresses, or database links at the end of each entry. Web sites were accessed September 2013.

Due to licensing agreements, access to articles in the Library's subscription databases is limited to current USAWC faculty, staff, and students. When off-network, USAWC personnel should use their login and password for remote access. For the Army community stationed elsewhere or deployed, many articles are online in AKO's "My Library" databases. Local libraries are another option.

This bibliography and others compiled by our research librarians are available online through the Library's home page at <http://usawc.libguides.com/bibliographies>.

For additional information, please contact Research, Instruction, and Access Services, U.S. Army War College Library, by sending an e-mail message to USAWC.LibraryR@us.army.mil, or by phoning DSN 242-3660 or Commercial (717) 245-3660.
