

CHAIRMAN OF THE JOINT CHIEFS OF STAFF MANUAL

J6
DISTRIBUTION: A, B, C, J

CJCSM 3150.01A
20 December 2002

JOINT REPORTING STRUCTURE GENERAL INSTRUCTIONS

References:

- a. DOD Directive 8910.1M, 11 June 1993, "Procedures for Management of Information Requirements"
- b. CJCSM 6120.05 Series, "Joint Interface Operational Procedures for Message Text Formats"

1. Purpose. In accordance with DOD Directive 8910.1M, this manual establishes procedures for a system of publications detailing standard reporting in DOD information systems.

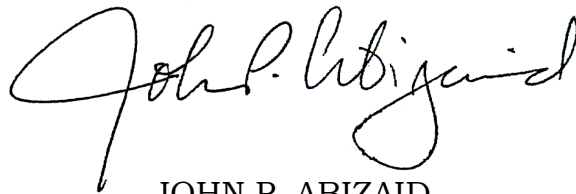

2. Cancellation. CJCSM 3150.01, 30 June 1999, "Joint Reporting Structure General Instructions," is canceled.

3. Applicability. This manual applies to the Joint Staff, combatant commands, subunified commands, joint task forces, subordinate commands, Services, Defense agencies and all others, as appropriate, involved with essential information in the planning, initiation, termination, and results of military operations. Reports in this manual are exempt from licensing in accordance with subparagraph E4b of Reference A.

4. Summary of Changes. This change:

- a. Updates the index for Joint Staff reporting instructions (Enclosure F).
- b. Consolidates and updates the references to each report summary (Enclosure F).
- c. Consolidates reference to the United States Message Text Format (USMTF) Program.

5. Releasability. This manual is approved for public release; distribution is unlimited. DOD components (to include the combatant commands), other Federal agencies, and the public may obtain copies of this manual through the Internet from the CJCS Directives Home Page--
<http://www.dtic.mil/doctrine>. Copies are also available through the Government Printing Office on the Joint Electronic Library CD-ROM.
6. Effective Date. This manual is effective upon receipt.

JOHN P. ABIZAID
Lieutenant General, USA
Director, Joint Staff

Enclosures:

- A--Overview
- B--Concept and Description
- C--Responsibilities
- D--Change Procedures
- E--Report Description Format

(INTENTIONALLY BLANK)

ENCLOSURE A

OVERVIEW

1. Background. This manual provides:
 - a. The responsibilities of joint reporting structure (JRS) participants, and the procedures for maintaining, monitoring, and reviewing the JRS.
 - b. The instructions, guidelines, and standards to be used in the organization, writing, and promulgation of subordinate publications to the JRS.
 - c. A report list with the appropriate CJCS 3150 Series directives, and a discussion of management procedures.
2. Participants. The JRS primary participants are the Joint Staff, the combatant commands and subordinate joint forces, the Services, and the following Defense agencies: Defense Intelligence Agency (DIA), Defense Logistics Agency (DLA), Defense Contract Management Agency (DCMA), National Imagery and Mapping Agency (NIMA), National Security Agency/Central Security Service (NSA/CSS), Defense Threat Reduction Agency (DTRA), and Defense Information Systems Agency (DISA). DISA manages the USMTF Program, as it is associated with JRS.
3. Organization of the JRS. The JRS is a system of publications detailing standard joint reports. The JRS has one basic directive, CJCSM 3150.01, "Joint Reporting Structure (JRS) General Instructions," with multiple subordinate directives, collectively called the JRS or the CJCSM 3150 Series. The JRS basic directive provides an index and procedures for standard-format management of the directives in the CJCSM 3150 Series. All CJCSM 3150 Series directives should comply with the Joint Publication (JP) 1-01 format.
4. Publication or Office of Primary Responsibility (OPR). Each subordinate JRS publication and each report within a subordinate JRS publication has an OPR assigned; in most instances, they are the same office. In some instances, the OPR for the 3150 Series and the OPR for the reports within a subordinate JRS publications are different; e.g., the Joint Staff/J-6 is the OPR for CJCSM 3150.01, but DISA IN5 is the OPR for the USMTF reports.
5. Intent. The intent of the JRS program is to continue the migration of JRS reports to USMTF as soon as possible as stipulated in Joint Staff policy and agreed to by the combatant commanders, Services, and Defense agencies.
6. Identification of JRS Reports. Report title or short title identifies reports within the JRS:

a. Report Title. Each report has a report title, e.g., "Commander's Situation Report," "Status of Resources and Training System." (See Enclosure F.)

b. Short Title. Most reports also have a short title or acronym code listing, e.g., "SITREP," "SORTSREP." For an alphabetical listing of report short titles tying them to the various report titles in the JRS, see Enclosure F.

7. Responsibilities. The JRS participants have specific responsibilities for monitoring, maintaining, and reviewing the JRS. OPRs will insure reports are converted to USMTF as soon as practical.

8. Change Procedures. Changes to the JRS may be proposed by any of the participants. The publication or report OPR, in accordance with CJCSI 5711.01 Series, "Policy on Action Processing," will process changes (see Enclosure D).

9. Report Description Format. Enclosure E details the format of a report description, and provides a standard arrangement of paragraphs and headings for all reports in the JRS.

10. Message Text Formats. Formatting will be accomplished in accordance with CJCSI 6241.02 Series.

ENCLOSURE B

CONCEPT AND DESCRIPTION

1. Features of the Joint Reporting Structure

a. The JRS satisfies:

(1) The Presidential and SecDef need for military information to perform their functions.

(2) The JRS participants' need for a central catalog of recurring reports that support command decisions regarding military operations and minimize duplicative reporting.

(3) The general need for standardization in reporting systems of the Joint Staff, combatant commands and subordinate joint forces, Services, and DOD agencies.

(4) The need for central management and standard rules regarding the application of USMTF to reporting systems.

b. The JRS provides:

(1) A standard procedure to ensure coordination of changes to the JRS.

(2) Standard formats for report descriptions, executive summaries, and data transmission.

2. Concept. The JRS reports are a major information source for the National Military Command System (NMCS). They provide information to the command centers of the President and Secretary of Defense, Chairman of the Joint Chiefs of Staff, commanders of combatant commands and the subordinate joint force commanders, DOD agencies, and the Services. Thus, the JRS covers numerous functional areas, such as personnel, materiel and equipment status, operational and logistic planning, situation monitoring, and intelligence, as well as actual military operations and exercises.

3. Description of the JRS Directives (CJCSM 3150 Series, JRS Reports). The JRS is comprised of multiple subordinate publications. Each directive contains descriptions of reports within similar functional areas. The JRS reports described in these directives may contain supplemental instructions to handle unique reporting characteristics.

(INTENTIONALLY BLANK)

ENCLOSURE C

RESPONSIBILITIES

1. Director for Command, Control, Communications, and Computer Systems (J-6), Joint Staff.

a. General. In matters relating to the JRS in general, the J-6, Joint Staff, has the responsibility to:

(1) Coordinate changes and guidance for operation and maintenance of the JRS in accordance with this publication, CJCSI 5711.01 Series, and JP 1-01.

(2) Administer, publish, and maintain the JRS.

(3) Monitor the effectiveness of the JRS and propose changes when necessary.

(4) Be the central point of contact for all matters concerning the JRS and effect coordination between the participants in accordance with Enclosure D.

(5) Be the office of primary responsibility (OPR) for CJCSM 3150.01, "Joint Reporting Structure (JRS) General Instructions (formerly JP 1-03)."

(6) Ensure that the JRS supports the Joint Staff policy and procedures outlined in CJCSI 6241.02, "USMTF Policy and Procedures."

b. JRS Reports. In matters relating to JRS reports in the CJCSM 3150 Series, the J-6, Joint Staff, has the responsibility to coordinate reviews of JRS reports to ensure the reports continue to satisfy information needs and, where appropriate, to initiate additions, deletions, or modifications of reports.

2. JRS OPRs. Each JRS publication has an OPR assigned. Reports in each publication also have an OPR assigned. The publication OPR and the report OPR may not be the same.

a. JRS publication OPRs have the responsibility to:

(1) Coordinate reviews of their JRS publications and related reports. Reviews will be completed on a 5-year cycle, as a minimum, beginning with the effective date of the publication or the last change and recurring every 2 years upon completion of the most current review.

(2) Coordinate new reporting requirements within the areas of their

publication and participate in the requirements validation process for JRS reports.

b. JRS report OPRs have the responsibility to:

(1) Determine information requirements within their respective areas of responsibility and participate in the requirements validation process for JRS reports.

(2) Determine, before developing a new reporting requirement, whether such a requirement can be met through existing reports.

(3) Monitor the JRS report for adequacy and validity of data and initiate any necessary corrective action.

(4) Be the single point of contact for coordinating and processing changes to the report.

(5) Initiate changes to reports through the USMTF Program configuration management process.

3. Services. The Services have the responsibility to:

a. Designate to the J-6 Directorate, Joint Staff, a point of contact within the Service headquarters for all matters concerning the JRS.

b. Review Service-reporting systems. If changes to these systems affect the JRS, they must request the report and/or publication OPR include approved changes in the JRS.

c. Determine, before issuing a new reporting requirement, whether such a requirement can be met through existing joint or Service reports.

d. Review JRS reports and forward proposals for changes to the CJCSM 3150 Series to the publication OPR, in accordance with Enclosure D.

e. Issue supplements at their discretion. Before publication, the Services will forward supplements to the publication or report OPR for coordination.

f. Establish data managers for Service-unique reporting systems. Service-unique messages used in the joint environment must be converted to USMTF as soon as practical.

4. Defense Agencies. The Directors, DISA, DIA, DLA, DCMA, DTRA, NIMA, and NSA have the responsibility to:

- a. Review their existing reporting systems and forward to the J-6 Directorate, Joint Staff, the reports that are appropriate for inclusion in the CJCSM 3150 Series.
- b. Designate to the J-6 Directorate, Joint Staff, a point of contact within the agency headquarters for all matters concerning the JRS.
- c. Review JRS reports and forward proposals for changes to the CJCSM 3150 Series to the publication or report OPR, in accordance with Enclosure D.
- d. Determine, before issuing a new reporting requirement, whether such a requirement can be met through existing joint or Service reports.

5. Commanders of Combatant Commands. Commanders of combatant commands have the responsibility to:

- a. Make maximum use of the JRS and USMTF messages available in the approved format.
- b. Monitor reporting requirements appearing in the CJCSM 3150 Series and recommend changes for improvement to the publication or report OPR.

(INTENTIONALLY BLANK)

ENCLOSURE D

CHANGE PROCEDURES

1. Changes to the JRS. Changes to the JRS may include policy, procedures, or instructions, new information requirements or data elements, or revisions or deletions of existing JRS directives or reports. Any one of the JRS participants may originate a change proposal to the CJCSM 3150 Series directives.

2. Changes to USMTF. Changes to USMTF messages will be done in accordance with USMTF configuration management (CM) plan. Refer to the USMTF web page at: <http://usmtf.disa.mil> for additional information.

3. Urgent Reporting Requirements. There may be occasions when information is required sooner than a change proposal can be staffed. The requesting office will coordinate the urgent requirement with the appropriate publication or report OPR and the J-6 Directorate, Joint Staff. The requirement will be filled using an existing standardized report in USMTF, e.g., GENADMIN (Enclosure F). Should this urgent requirement evolve into a recurring report, the requesting office will initiate a change procedure to formalize the report.

4. Changes to Service Reports

a. The final responsibility for Service reports rests with the Service concerned. The change procedures set forth in this enclosure are not intended to regulate the Service reporting systems.

b. Information reported in Service-controlled reports may be made available to other organizations with the concurrence of the controlling Service.

(INTENTIONALLY BLANK)

ENCLOSURE E

REPORT DESCRIPTION FORMAT

(To be used as a guide for the sequence of data entered for non-USMTF messages)

1. General. Align all reports in the JRS in the standard arrangement shown below.

PUBLICATION NUMBER

REPORT TITLE

SHORT TITLE

(The short title is an acronym formed from the report title)

2. Format. Describe the details of the report thoroughly with concise entries under each of the paragraph headings numbered and highlighted below.

a. Subject and Purpose. Provide a brief description of the nature and purpose of the report, and indicate implementing authority or reference for the report.

b. Submitted By. Indicate the agencies or organizations required to submit the report.

c. Submitted To. Indicate the organizations or agencies to which the report is made, subdivided into action and information addressees, as required.

d. When Submitted. Indicate whether reporting is by exception, as required, or on a regular basis. If the latter, indicate the exact time of day when applicable. Indicate any connection to defense readiness condition reporting.

e. How Submitted

(1) Classification. Indicate appropriate classification and declassification of reports when they can be determined in advance; otherwise, the submitting agency may be required to determine the proper classification and declassification.

(2) Transmission. Indicate the primary and alternate methods of report submission, i.e., DMS (AUTODIN), telephone, or mail.

(3) Precedence. Indicate the desired precedence according to type of report and urgency of reported data. This precedence should be determined in relationship to all other traffic.

Enclosure E

(4) MINIMIZE. State whether the report should be submitted if MINIMIZE is in effect. If reporting during MINIMIZE is conditional, state the exact circumstances under which reports will continue to be electrically transmitted. Policy concerning MINIMIZE is contained in Chapter 3, Section VII, ACP 121, US Supplement 1.

f. Report Indicator (Optional). Provides discreet, unique identification to each report for automated processing.

g. Specific Reporting Instructions (Optional). Provide information on specific data to be reported, including any special notes or instructions that may be applicable. Include any specialized definitions of data elements.

(1) Report Header Record (Optional). It precedes the first detail record of each report. The header record identifies the originator, the database to be updated, and the report number.

(2) Report End Record (Optional). It follows the last detail record of each report. The end record correlates to the matching header record to confirm the originator, the database being updated, and the end of the specified report number.

(3) JRS Control Data (Optional). The data elements in record positions 1-8 at the beginning are common to all detail records and are used to control the update of the file.

(4) Detail Record Data Elements (Optional). This paragraph explains the specific data to be reported for the detail records. Each data element is identified in the data field by a code consisting of the record type and the data field number.

h. Report Content (Optional). Provide data formats and examples of fixed entries required for automated reports. For narrative-type reports, indicate any paragraph headings or numbers to be used.

i. Sample Report (Optional). Provide a sample of what an actual report should look like when deemed useful for guidance to agencies that will be submitting or receiving reports. These samples should include complete identification and information for the body of the report but may omit addressing information.
